This is UNEVALUATED Information

SOURCE EVALUATIONS ARE DEFINITIVE. APPRAISAL OF CONTENT IS TENTATIVE.

1. An important motor-fuel depot is located north of Plovdiv on the road to Jevskigrad. This is an underground depot which covers an area of 150 x 60 meters. This area has six large grassy mounds with openings covered with cement plates. The openings are probably funnels for the fuel tanks. The area covered by the grassy mounds is about 500 to 600 square meters in size.
2. There is a building 50 meters long and five to six meters high located on an elevated platform. In front of this platform is a fuel truck. At the northern end of the area there is a small building and a guard post. An officer and civilian employees are stationed at the depot.
3. Sketches showing the location of the fuel depot are attached as an Appendix to this report.
